Process & Design Engineering (m/f/d)

Process & Design Engineering (m/f/d)

Tecloan is a young dynamic recruiting company combined with a long-term technical experience of our employees! We have specialized ourselves in bringing together professional technicians with companies searching for qualified staff. Our clients include both small local and very well-known international companies.

One of our customers is an international technology Group and supplies plants, systems, equipment, and services for various industries. The company is a technology and market leader in hydropower, in the pulp and paper industry, in the metalworking and steel industries, and in municipal and industrial solid/liquid separation. Actually they are searching for a:
